

NOA LAPIDOT

+972-545391286 | noaberdah@gmail.com | [Linkedin](#)

Software Engineer with a B.Sc. in Computer Science, specializing in Python and c++ backend development and scalable systems.

Experience building REST APIs, working with SQL databases, and developing event-driven architectures using modern tools and frameworks.

Strong foundation in data structures, algorithms, and object-oriented design, with hands-on experience debugging complex systems and improving performance.

Passionate about building reliable, high-quality software and eager to grow in a production-oriented environment while contributing to impactful systems.

TECHNICAL SKILLS

- **Languages:** C, C++, C#, JavaScript, Python, SQL
- **Frameworks & Libraries:** .NET, FastAPI, Express.js
- **Tools & Platforms:** RabbitMQ, Kafka, Git, GitHub, MongoDB, Linux
- **Methodologies:** OOP, REST APIs, Client-Server Architecture, Asynchronous Programming, API Integration, Data Modeling

PROJECTS

Open Source Contributor – uBlock Origin (Fork) | [GitHub](#)

- Designed and implemented modular features in a complex browser-based system using JavaScript and WebExtensions API
- Debugged and extended dynamic DOM manipulation mechanisms for real-time UI control
- Developed time-based automation logic with multiple runtime states (Study / Kids / Night modes)
- Implemented client-side data persistence (IndexedDB, LocalStorage) with focus on performance and scalability
- Worked with asynchronous event-driven architecture and state management

Final Project Grade: 98

Mini Social Network (Facebook-like System) | C#/.NET

- Designed and implemented a client-server architecture supporting user authentication, posts, messaging, and interactions
- Developed backend logic and data models with focus on scalability and performance
- Implemented REST APIs and managed data persistence
- Applied object-oriented design principles and clean architecture practices

EDUCATION

B.Sc. in Computer Science - The Academic College of Tel Aviv–Yaffo

2021-2025

MILITARY SERVICE

Visual Intelligence Analyst – IDF Unit 9910

2017-2020

Visual Intelligence Analyst

- Analyzed multi-source data systems in real-time environments
- Worked with complex data platforms requiring precision, debugging mindset, and anomaly detection
- Identified system inconsistencies and contributed to operational decision-making

Commander – VISINT Analysis Course

- Led and trained 40 analysts on analytical systems and methodologies
- Managed onboarding of new tools and systems, including integration into operational workflows

LANGUAGES

Hebrew – Native | French – Native | English – Fluent
